

JOHN MICHAEL S. NICOLAS

TEST ENGINEER - SENIOR ASSOCIATE

PROFESSIONAL SUMMARY

QA Engineer dedicated to maximizing product reliability, user trust, and release velocity across banking application releases. Specializing in scalable web and mobile applications, I establish robust test automation, regression frameworks, and proactive bug tracking to catch critical flaws before your clients or customers do.

WORK EXPERIENCE

Quality Assurance Engineer, 09/2022 to Current

Genpact LLC - Muntinlupa, National Capital Region

- Reduce testing cycle duration by **40% through automated testing using SpecFlow Selenium** across banking application releases.
- Perform manual and automated testing for Philippines' local bank credit bureau applications against financial regulations and industry standards.
- Develop and execute test cases and scripts covering functional, integration, and regression scenarios.
- Log defects in Jira and partner with developers to drive prompt issue resolution.
- Participate in daily scrum meetings, share testing updates, and coordinate with interdisciplinary teams for smooth releases.
- Coordinate UAT with product teams while managing the testing workflow from execution through sign-off.
- Validate infosec password management, support core banking migration, build a test data generator tool, and identify parallel discrepancies across applications.

QA Tester, 09/2019 to 09/2022

Infolink - V.A. Rufino

- Conducted thorough system integration testing (SIT) and performed functional and regression testing for PNB's CMS application.
- Engaged with project managers, developers, and implementation officers to delineate testing priorities, schedules, and deliverables.
- Addressed duplicate entry challenge in CMS portal shielding company from potential revenue decline
- Enhanced testing efficiency and broadened coverage by local vendors through implementation of automation testing with Rapise.
- Synchronized activities with project managers, developers, and implementation officers to maintain clarity in testing priorities, schedules, and deliverables.
- Coordinated with diverse business units to review project disposition and scheduling.
