

JOHN MICHAEL S. NICOLAS

TEST ENGINEER - SENIOR ASSOCIATE

PROFESSIONAL SUMMARY

QA Engineer dedicated to maximizing product reliability, user trust, and release velocity. Specializing in scalable web and mobile applications, I establish robust test automation, regression frameworks, and proactive bug tracking to catch critical flaws before your clients or customers do.

PROFESSIONAL EXPERIENCE

Genpact LLC - Quality Assurance Engineer

Muntinlupa, National Capital Region

09/2022 - Current

- Performed comprehensive manual and automated testing of all Philippines' local bank credit bureau banking applications, verifying adherence to financial regulations and industry standards.
- Crafted and executed detailed test cases and scripts emphasizing functional integration and regression testing.
- Logged defects in Jira and partnered with developers to guarantee prompt issue resolution.
- Engaged in daily scrum meetings, providing testing updates and collaborating with interdisciplinary teams to facilitate smooth releases.
- Spearheaded UAT by collaborating with product teams and managing testing workflow
- Executed efficient migration of core banking application to new platform.
- Minimized testing cycle duration by 40% through integration of automated testing using SpecFlow Selenium.
- Spearheaded testing of infosec web-based password management for credit bureau platform to ensure secure login, sign-up, and user account management with SMS and OTP functionalities while collaborating closely with information security team.
- Constructed test data generator tool streamlining process of generating test data.
- identified blinded parallel discrepancies occurring in various applications concurrently.

Infolink - QA Tester

V.A. Rufino
