### PROFESSIONAL EXPERIENCE

09/2022 to Current

**Quality Assurance Engineer**

**Genpact LLC** – Muntinlupa, National Capital Region

- Performed comprehensive manual and automated testing of all Philippines' local bank credit bureau banking applications, verifying adherence to financial regulations and industry standards.
- Crafted and executed detailed test cases and scripts emphasizing functional integration and regression testing.
- Logged defects in Jira and partnered with developers to guarantee prompt issue resolution.
- Engaged in daily scrum meetings, providing testing updates and collaborating with interdisciplinary teams to facilitate smooth releases.
- Spearheaded UAT by collaborating with product teams and managing testing workflow
- Executed efficient migration of core banking application to new platform.
- Minimized testing cycle duration by 40% through integration of automated testing using SpecFlow Selenium.
- Spearheaded testing of infosec web-based password management for credit bureau platform to ensure secure login, sign-up, and user account management with SMS and OTP functionalities while collaborating closely with information security team.
- Constructed test data generator tool streamlining process of generating test data.
- identified blinded parallel discrepancies occurring in various applications concurrently.

09/2019 to 09/2022 **QA Tester**

**Infolink** – V.A. Rufino

- Conducted thorough system integration testing (SIT) and performed functional and regression testing for PNB's CMS application.
- Engaged with project managers, developers, and implementation officers to delineate testing priorities, schedules, and deliverables.
- Addressed duplicate entry challenge in CMS portal shielding company from potential revenue decline
- Enhanced testing efficiency and broadened coverage by local vendors through implementation of automation testing with Rapise.
- Synchronized activities with project managers, developers, and implementation officers to maintain clarity in testing priorities, schedules, and deliverables.
- Coordinated with diverse business units to review project disposition and scheduling.

03/2018 to 04/2019 **Electronic Banking Support**

**Intech** – Talumpong Mandaluyong

- Provided expert guidance and retraining via remote channels and direct interactions with UnionBank's local clients in Philippines.
- Coordinated with implementation officers and relation manager to resolve client technical issues
- Delivered technical support and training remotely or through in-person visits to diverse local clients in Philippines.
- maintained organized technical files of unionbanks clients.
